

Questionnaire for the Platform for Redesign 2020

All Parties of the UNFCCC have been invited to fill out a questionnaire on policies, measures and actions on climate change and environmental protection in the context of COVID-19 recovery. The questionnaire responses directly correspond to the content on each of the country pages.

The questionnaire asks countries to fill in the following information:

- [Name of measures and Explanations]: Any climate change or other environmental measures that are supported by the country's planned and/or implemented COVID-19 measure, including their status (as part of government strategy/planning, parliamentary decisions, third-party committee recommendations, etc.).
- [References]: Any information sources, if available, for further details regarding the measure (e.g. website links)
- [Contact details]: Individual(s), body, or agency in charge of the policy, measure, or action.

[Supplementary information]

While not mandatory, countries are also encouraged to categorize each measure by time frame and sub-category, as follows:

Corresponding time frame: Response; Recovery; Redesign; Response-Recovery; Recovery-Redesign; or All terms.

- "Response" refers to emergency measures in the short term (a few months to one year) to address concerns that have directly emerged from the COVID-19 pandemic and may include forced action.
- "Recovery" in this questionnaire refers to socioeconomic measures in the medium term (one to a few years) with an environmental and climate focus to "build back better" from COVID-19, and usually involves planned, intentional action.
- "Redesign" refers to paradigm shifts and measures in the long term (more than a few years to a few decades) toward redesigning current socioeconomic and sociocultural systems to be sustainable and resilient.

List of Sub-categories:

A. Climate Mitigation Measures

- A1. Transition to renewable energy
- A2. Sustainable transportation
- A3. Building sector
- A4. Industry sector
- A5. Household sector
- A6. Technological innovation (digitalization / hydrogen/ CCUS, etc.)
- A7. Land sector
- A8. Others

B. Climate Adaptation Measures

- B1. Adaptation planning
- B2. Water
- B3. Agriculture/food security

- B4. Health
- B5. Infrastructure
- B6. Tourism
- B7. Human settlements
- B8. Others
- C. Cross-cutting Measures
 - C1. Sustainable finance (public/private)/market mechanisms/carbon pricing
 - C2. Urban/rural development (energy access etc.)
 - C3. Citizens' lives (behavior change) / employment
 - C4. Governance
 - C5. Others
- D. Other Environmental Measures
 - D1. Waste management and Circular Economy / sustainable production and consumption
 - D2. Other environmental pollution countermeasures
 - D3. Measures related to ecosystem services / biodiversity / land use / agriculture
 - D4. Others
- E. International Cooperation
 - E1. COVID19 recovery and climate change mitigation
 - E2. COVID19 recovery and climate change adaptation
 - E3. COVID19 recovery and other environmental issues
 - E4. Others
- F. Others
